QUESTIONS

- Q1 Matrix multiplication 10 marks
- Q2 . Largest number 10 marks
- Q3 Smallest number 10 marks
- Q4 . Nth largest number 10 marks
- Q5 Palindrome number/string 10 marks
- Q6 Removing duplicates in array 10 marks

6/6 answered

Q6 **Removing duplicates in array** 10 marks

Removing duplicates in array

Your Code

```java
public class RemoveDuplicates {
    public static void main(String[] args) {
        int[] arr = {10, 20, 30, 20, 40, 10, 50};
        System.out.print("Array after removing duplicates:\n ");
        for (int i = 0; i < arr.length; i++) {
            boolean duplicate = false;
            for (int j = 0; j < i; j++) {
                if (arr[i] == arr[j]) {
                    duplicate = true;
                    break;
                }
            }
            if (!duplicate) {
                System.out.print(arr[i] + " ");
            }
        }
    }
}
```

- Q6 Removing duplicates in array 10 marks

6/6 answered

Q5 **Palindrome number/string** 10 marks

Palindrome number/string

Your Code

```java
public class PalindromeNumber {
    public static void main(String[] args) {
        int num = 121;
        int temp = num;
        int rev = 0;
        while (num > 0) {
            int rem = num % 10;
            rev = rev * 10 + rem;
            num = num / 10;
        }
        if (temp == rev)
            System.out.println("Palindrome Number");
        else
            System.out.println("Not a Palindrome Number");
    }
}

QUESTIONS

- **Q1** Matrix multiplication — 10 marks
- **Q2** . Largest number — 10 marks
- **Q3** Smallest number — 10 marks
- **Q4** . Nth largest number — 10 marks
- **Q5** Palindrome number/string — 10 marks
- **Q6** Removing duplicates in array — 10 marks

6/6 answered

Q4 . Nth largest number — 10 marks

. Nth largest number

Your Code

```
import java.util.Arrays;
public class NthLargestNumber {
    public static void main(String[] args) {
        int[] arr = {10, 50, 30, 20, 40, 60};
        int n = 3;
        Arrays.sort(arr);
        System.out.println("Nth Largest Number = " + arr[arr.length - 
    }
}
```

Input

stdin input

Output

```
Nth Largest Number = 40
```

6/6 answered

Q3 Smallest number — 10 marks

Smallest number

Your Code

```
public class Main {
    public static void main(String[] args) {
        int num1 = 25;
        int num2 = 14;
        int num3 = 46;
        int smallest = num1;
        if (num2 < smallest) {
            smallest = num2;
        }
        if (num3 < smallest) {
            smallest = num3;
        }
        System.out.println(smallest);

6/6 answered

Q2 . Largest number 10 marks

. Largest number

Your Code

```java
import java.util.Scanner;

public class Main {
    public static void main(String[] args) {
        int num1 = 4;
        int num2 = 8;
        int num3 = 10;
        int largest = num1;
        if (num2 > largest) {
            largest = num2;
        }
        if (num3 > largest) {
            largest = num3;
        }
        System.out.println(largest);
    }
}
```

Q1 Matrix multiplication 10 marks

Matrix multiplication

Your Code

```java
public class MatrixMultiplication {
    public static void main(String[] args) {
        int[][] M1 = { {3, -2, 5}, {3, 0, 4} };
        int[][] M2 = { {2, 3}, {-9, 0}, {0, 4} };
        int r1 = M1.length;
        int c1 = M1[0].length;
        int r2 = M2.length;
        int c2 = M2[0].length;
        if (c1 != r2) {
            System.out.println("Multiplication not possible");
            return;
        }
        int[][] product = new int[r1][c2];
        for (int i = 0; i < r1; i++) {
            for (int j = 0; j < c2; j++) {
                for (int k = 0; k < c1; k++) {
                    product[i][j] += M1[i][k] *M2[k][j];
                }
            }
        }
        for (int i = 0; i < r1; i++) {
            for (int j = 0; j < c2; j++) {
                System.out.print(product[i][j] + " ");
            }
            System.out.println();
        }
    }
}
```

Input

stdin input

Output

```
24 29
6 25
```
